

# A single window for all your payment transaction data

Cross-border payments and financial transactions have never been more complex. Customer demand for faster processing, increased visibility and proactive resolution, along with massive growth in transaction volumes and the move to ISO 20022, puts ever more pressure on financial institutions to provide ease, speed and transparency.

## Intix: A complete view of real-time transaction data all on one platform

With Intix, you get a complete picture of your transaction data at every step, and instant access to all your transaction data in one place, whatever the source. You can track the progress of every transaction and give your customers better insights and faster resolution.

**Find the needle in  
your transaction haystack**

**Get actionable insights from  
transaction data in seconds**

**Stay compliant with industry  
regulations and ISO 20022**

### The platform for instant transaction data insights

The Intix platform delivers complementary transaction data management solutions:

**Access, search and report on  
transaction data in seconds**

**Track transactions in real-time  
across their entire lifecycle**

## Transaction Analytics

**Access, search and report on transaction data with the click of a button**

Get a clear, comprehensive view of your transaction data:

- Advanced search capabilities
- Instantly retrieve search results
- Support compliance and record keeping regulations
- Simplify reporting using advanced dashboard reporting features and analytics
- Easily access long-term historical data archive

Transaction Analytics deliver the foundation for better decisions and compliance.

## Track & Trace

### Track transactions in real time across their entire lifecycle

Bring all your data together, including master data sets, to build a full, real-time picture of transactions being processed across the entire lifecycle. Uncover the insights you need, address problems proactively and avoid the pitfalls of failed SLAs.

- Fix the friction in your transaction flow
- Turn data into action, in real-time
- Continuously monitor and meet SLAs

Track & Trace offers the ability to monitor and track issues in real-time, providing a transparent process monitoring system that assists in achieving operational excellence.

## Creating efficiencies for you and your customers

Intix optimises operational, IT, compliance and business teams across your organisation, allowing you to serve your customers with confidence and transparency.

### Simplify reporting and analysis

Having all your data together means you can aggregate and understand it, even down to individual transactions and related processing events.

### Improve customer service through automation

We make it simple for your people to find the information they need, quickly. With powerful automation, we reduce manual tasks and time to manage queries, allowing your team to focus on value-added tasks.

### Compliance and forensics support

With all your data organised in one place, we give you the foundation to respond to evolving regulatory requirements. With configurable reporting, you can manage your compliance commitments in a timely manner.

### Seamless integration

Intix works with what you already have, so there's no need to replace your current systems. Instead, we bring all your data together and make it usable.
