B2BinPay v18 Release

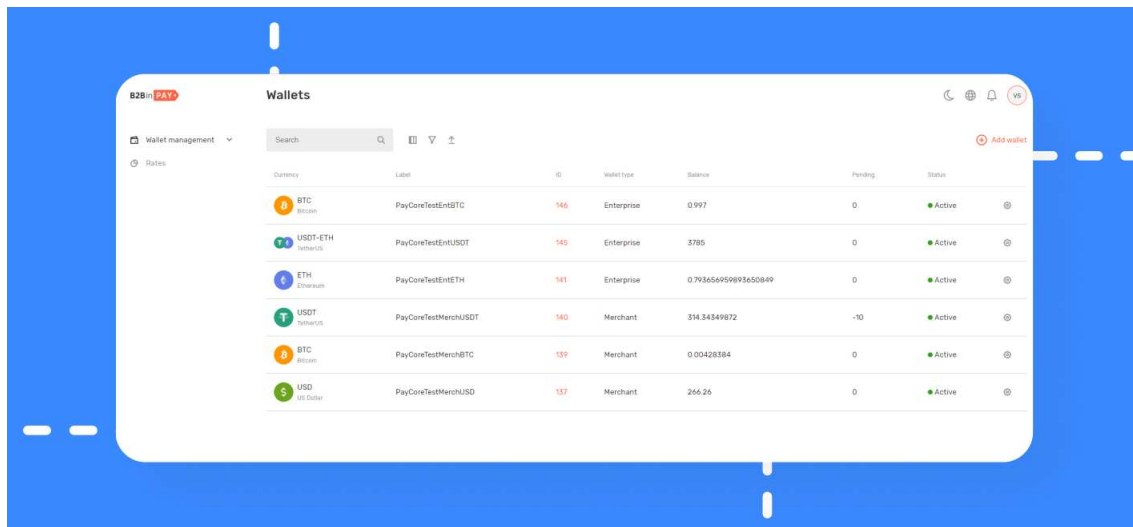

B2BinPay v18 Offers Brand New Account Merge Feature Providing Unified Access for All Users

B2BinPay, after the successful launch of [v17](#), is now releasing v18 with even more advancements for its clients. The company continues its dedication to excellence by introducing a unified account system that merges Merchant and Enterprise models, making cryptocurrency transaction management significantly more straightforward.

Additionally, this version features a completely redesigned frontend and stricter regulatory adherence, enhancing user experience and ensuring safety. B2BinPay customers can expect a new era of streamlined and secure transactions with the latest v18 release.

Let's review the exciting changes and see how they enhance your experience with B2BinPay.

Introduction to Account Unification

B2BinPay's v18 release brings a major change to its clients - the account unification, also known as Merge. This new approach transforms how the company offers its services.

The update simplifies the platform by merging the Merchant and Enterprise business models into a single user-friendly interface. Clients can now easily customise the functionalities to meet their specific needs and manage their transactions within one integrated system. This innovation simplifies operations and gives clients complete control over their transactions. Here are some of the benefits that the Merge offers to the company's users.

Simplified Account Structure

B2BinPay has recently updated its account structure by removing the division between Merchant and Enterprise users. As a result, a single account provides access to the functionalities of both wallet types. This change in the account structure has simplified the registration process, allowing clients to join the platform effortlessly without going through extensive details about each wallet type. With this streamlined approach, businesses can immediately start using the company's services and focus on what truly matters - growing their business.

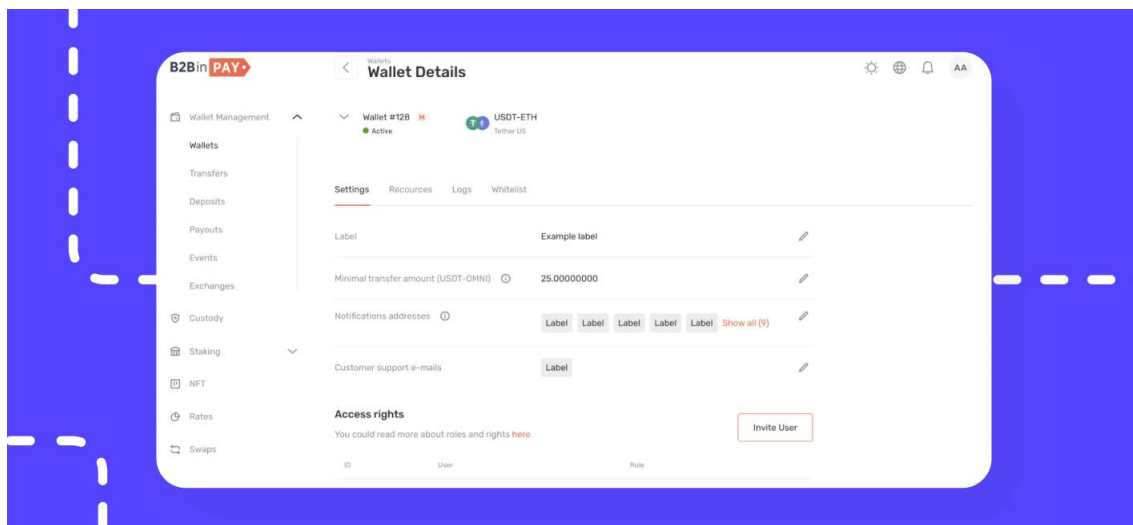

Enhanced Client Onboarding and Operation

With a single fee that applies to everyone, onboarding is now a simple, one-time process. Clients can switch between wallet services without incurring additional costs or complicated administrative processes once onboarded so that they can adjust their business needs accordingly. Taking a straightforward approach is a way to honour the clients' time and support their growth.

New Front-End & More Powerful Functionality

B2BinPay's v18 release has been updated to align with the [B2Broker](#) family's aesthetic, offering more than just an attractive interface. As a result, the company has enhanced the speed and security of the system, making it more robust and reliable. In the same manner, it's maintained the core features users know and love, so you feel like you're making a seamless transition. Here are the areas that have been completely remodelled:

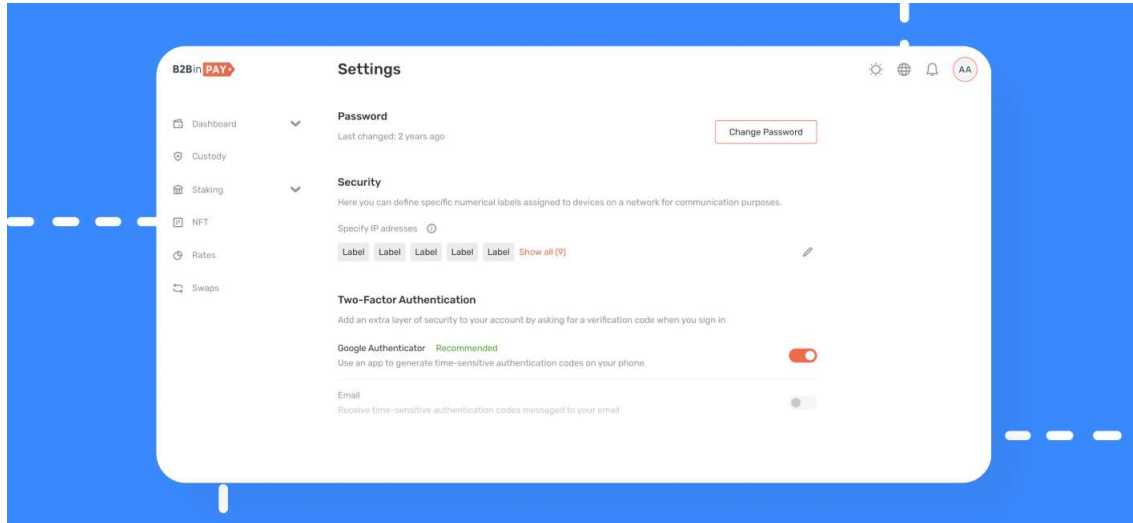

Wallets & Transfers

With a cleaner design and streamlined processes, the wallet and transfer pages are significantly faster and easier to navigate. Likewise, the company improved the user interface for payouts, bank withdrawals, and

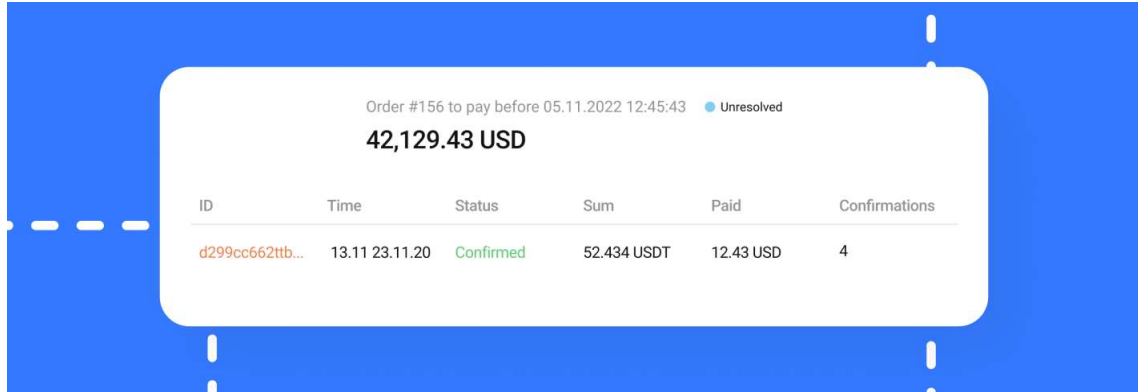

exchanges, making all financial operations simpler and more efficient, saving users time.

New Account Menu

Using the new Account Menu, you can set preferences, control API permissions, and customise your profile, all with ease. It was designed to make the company's account management interface more user-friendly and secure. The new, user-friendly design philosophy has also been applied to the Payment Page, ensuring safe and secure financial transactions by using Two-Factor Authentication (2FA).

Flexible Invoice Management

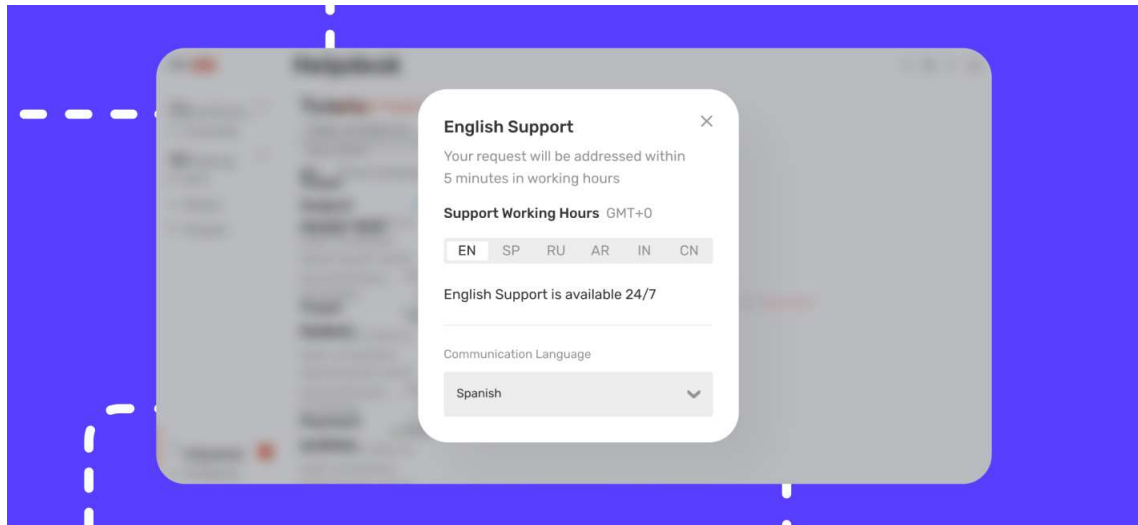

Order #156 to pay before 05.11.2022 12:45:43 Unresolved

42,129.43 USD

ID	Time	Status	Sum	Paid	Confirmations
d299cc662ttb...	13.11 23.11.20	Confirmed	52.434 USDT	12.43 USD	4

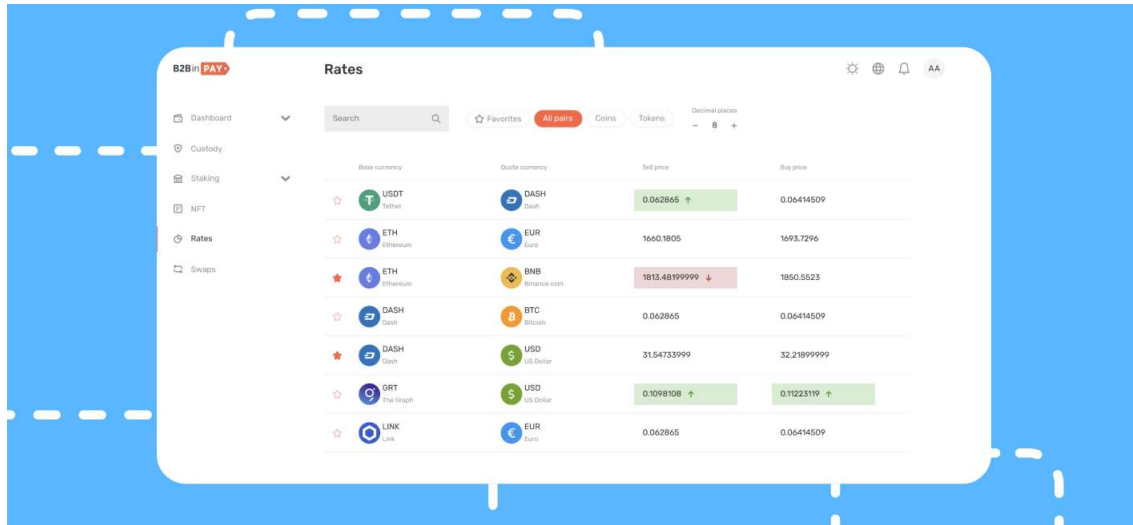

In order to empower clients with greater control, the company removed the 7-day expiration limit on merchant invoices. This update allows for customised invoice timelines, ensuring that invoices can be tailored to individual business processes.

Intuitive Helpdesk Experience

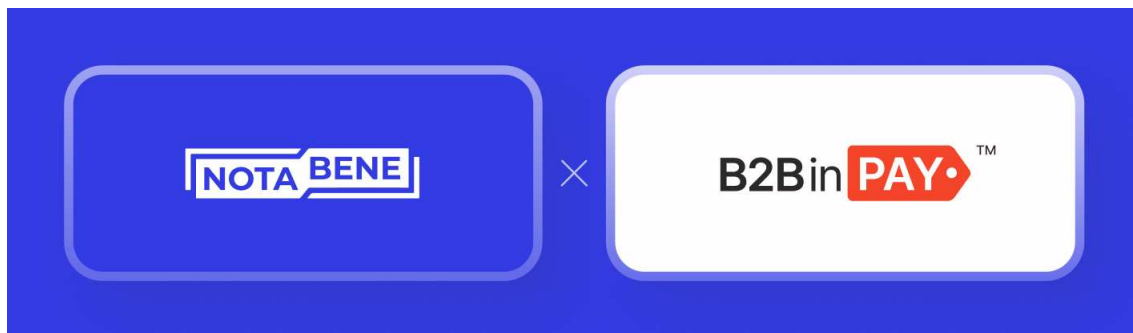

Keeping apprised and responsive with the new stickers for incoming messages has never been easier. The user experience of the Helpdesk has significantly improved, with multilingual support guided by a well-defined schedule.

Rates Interface Improvements

With the new Rates UX, you can easily customise favourites and filter your results. In addition, currency rates have been moved from the wallet's menu to a top-level menu, simplifying access and improving efficiency.

FATF Travel Rule Compliance

B2BinPay is dedicated to upholding the highest standards of regulatory compliance and transparency in all of its operations. As part of this commitment, the company has recently integrated a new Travel Rule solution provider, Notabene, to ensure compliance with the Financial Action Task Force (FATF) Travel Rule requirements.

The FATF Travel Rule is a regulatory standard that mandates the collection and sharing of personal information in cryptocurrency transactions to prevent money laundering and other illicit activities.

Virtual Asset Service Providers (VASPs), like B2BinPay, must share specific information about the senders and receivers of fund transfers. This rule is instrumental in identifying suspicious activities and preventing fraud.

Final Remarks

[B2BinPay](#), a leading provider of cryptocurrency payment solutions, offers businesses a secure, efficient, and cost-effective way to manage global crypto transactions. The company strives to provide its customers with the most advanced, secure, and user-friendly payment processing solutions, as evidenced by the v18 release.
